

Needfinding: Exercise

Human Computer Interaction

Catia Prandi
catia.prandi@unibo.it

Administrativa

- **Assignment 1**
- Next lab (October 7) is for **choosing** your specific domain and **preparing** a draft of the questions

Goal

- Reflect on good vs. bad interviews
- Plan the interview process in a sample domain
 - Start developing the questions
- **Interactive exercise** – please contribute, suggest and comment!

Can You Spot the (10) Mistakes?

A Sample Domain

- Theme: Transportation
- Specific domain:

A Sample Domain

- Theme: Transportation
- Specific domain: car sharing for commuting

Target user(s)

Try to maximize their involvement!

- **Immediate users:** «the typical users who will engage with the product or service as soon as it's available. They represent the primary target audience and interact with the design under normal circumstances»
- **Lead experts:** the more advanced or experienced individuals who face problems that the broader user base will likely encounter in the future. They often push the boundaries of how a product or service is used and can provide insights into future trends and innovative solutions.»

Target user(s)

- **Extreme Users:** “they fall at either end of the spectrum in terms of how they use a product—either using it far more intensely or minimally than most. Studying extreme users helps designers consider edge cases and understand how design can cater to diverse needs.”
- **Domain Experts:** “they have deep knowledge and experience in the field related to the product or service. They provide critical insights about best practices, standards, and potential pitfalls, helping the design process align with the technical and professional expectations of a specific domain.”

Target user(s)

- Immediate users: college students who share cars for commuting; low budget (they used the cheapest car sharing so far); no property car; car sharing at least once a week
- Domain experts: provider of the car sharing service
- Lead users: car driver in car sharing services
- Extreme users: ?

Planning an Interview

- To whom?
- **Direct 1:1 Interview** vs. Focus Group vs. Survey
- General Structure
- Questions
 - How many?
 - Which ones?
- Interacting
 - Follow-ups?
- Recording
 - Paper / Audio / Video / Pictures ?

Interview Structure

- Introduction: why are we here? time, about an investigation on..., not testing you, you are helping us, there are no wrong answers, how it works, ask for permission to share/elaborate responses + recordings
- Questions about the topic: some are the same for everyone, some depend on the user. Possible steps:
 - Background/Context
 - Going deep
 - Clarifications/successes and failures
 - Reflections
- Questions about the user: how often they use <transportation mean>? ...
- Thank you, (gift), contact information

Questions (a few examples)

Questions (a few examples)

- Why did you start using car sharing?
- On a scale...how was your last experience with car sharing?
 - Alternative: can you describe your last experience...?
- How often do you commute with car sharing?

- These slides are a modified version of the ones of prof. Luigi De Russis, PoliTo. A big thanks to Luigi De Russis (PoliTo) for his work!
